# **WEATHER SYNOPSIS BY REGION**

#### **NORTHERN CALIFORNIA**

Decreasing chances for rain showers through the day, with only trace to 0.05" of additional rainfall expected this morning. Highs generally in the 50s. West to Northwest winds around 10 mph.

Widespread foothill rains and mountain snow continues today and into tonight. Snow levels will drop to around 5000 ft. Expect snow to begin to diminish early Sunday morning. Rain will continue on the Yuba and Butte County burn scar areas with additional accumulations of 0.30"-0.60" before rainfall decreases during the evening. High temperatures will be in the middle 50s with south winds at less than 10 mph.

Unsettled weather, including higher humidity, cooler temperatures and periods of precipitation will affect the region through next week. The first in a series of Pacific troughs will be over the area with in the form of precipitation across the south and east today. The second trough will skirt over the area tomorrow and into tomorrow night producing some lighter precipitation favoring the northern third or so. Weather models have come in a little drier with their precipitation results the next 48 to 72 hours although liquid water values up to 3.5 inches very possible across portions of the northern Sierra, especially west facing slopes. Main snow accumulation level will be above 5000 feet today.

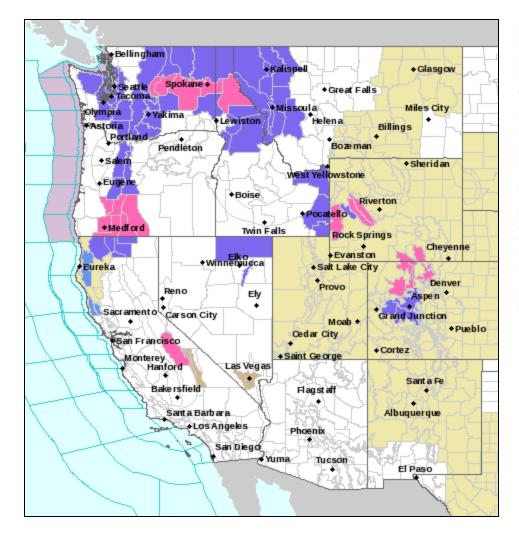

#### **SOUTHERN CALIFORNIA**

Mostly cloudy with a chance for rain showers with only a trace-0.05" expected. Highs in the 60s. Light winds through the period.

A Pacific trough will continue to bring scattered showers to Central California through Sunday morning. Scattered showers will develop across the region this evening and continue through Sunday morning. Most locations will receive less than a quarter inch of additional rainfall, but the Central Sierra and its associated foothills will receive an additional half inch to an inch of rainfall. The snow level will be around 8,000 feet. This trough will also bring westerly winds of 20 to 30 mph with gusts to 50 mph to the mountain ridges and desert passes through Monday evening. Maximum temperatures will be 5 to 10 degrees below normal through Monday, with mid 40s to mid 50s across the mountains and 60s to low 70s in the valleys. A ridge of high pressure will bring warming and drying to the region Tuesday and Wednesday. Temperatures will be near to a little above normal and minimum humidity will drop to 15% to 30% Tuesday and Wednesday. Another Pacific trough will bring a cooling trend along with scattered light showers to the area late next week. This trough will also bring strong and gusty westerly winds to the mountains and deserts.
